

MP3**Construct Viable Arguments and Critique the Reasoning of Others**

- Understand and use assumptions, definitions, and previously established results
 - Make conjectures, build logical arguments, and explore the truth of their conjectures
 - Recognize and use counterexamples
- 
- The image shows two young women sitting at a desk, looking at an open book. One woman is pointing at the book while the other looks on. A laptop is open to the left of the book. The background is plain white.
- Justify conclusions and communicate them to others
 - Compare the effectiveness of two plausible arguments
 - Construct arguments using objects, drawings, diagrams, and actions
 - Listen to the arguments of others and ask useful questions to clarify arguments
