

I Have..., Who Has...?

Parent Review

This game reviews equivalent fractions, decimals and percents.

As a review, remember that when you divide the numerator of a fraction by the denominator you will get the decimal equivalent. Then move the decimal point two places to the right to get the percent equivalent. To see how and why this works review Chapter 4 of the Green pupil book. The book is accessible at no cost on the Student Tab of the Big Ideas website.
